Conference Schedule

Week of: **julio 4**

NOTES

Learning Lab: space to go in-depth into the three subtopics of CEI 2022. Each learning lab will be dynamic and interactive, and will include a vlog previously made by the country hosts that virtually transports the students to a fascinating and unique location in Costa Rica related to the subtopic being discussed." For virtual participants these will be guided sessions with a lesson plan provided so the activity can be completed at the leisure of the delegation and discretion of the delegation leader.

Province Challenge: all participants will be divided into Costa Rica's 7 provinces, each province is one team and each province is assigned a topic related to the conference's subthemes. The topic will be a real strength that the province has in real life. Teams will seek to win points in order to win. The province challenges, which will be related to each province's topic, will grant the most points. Teams will also win points in GeoGuessr, Virtual Pictionary, SDG Quiz,

Professional development: professional development sessions aimed at the students, with topics relevant to their projects and upcoming academic/profesional careers

Intercultural afternoon: a short show-and-tell-style fair where each country gets to present interesting aspects about their culture and traditions, may it be coins, artifacts, costumes, food, etc. (Things don't necessarily have to be physically brought)

Memory time!: the time to wave good-bye to CEI 2022! During the conference week, young reporters will be tailing the delegations and creating vlogs to then showcase virtually in a physical room during Memory Time. Participants can go around the room and stop to watch the different video montages that sum up the conference week.

Reflection and discussion in province teams: students fill out surveys online - they are also welcome to attend either slot to do this in a group setting

Live stream	Online only session	Online only and hybrid options	Hybrid	Available online (delegation chooses when they complete)
